SCL #: 1999

DateRun: 06/17/1999

Experimenters: Jason Marshall

ClientType: Consultant

ProjectNumber: Project #1

Substrates: Ceramics, Alumina

PartType: Coupon

Contaminants: Alcohol

Cleaning Methods:

Analytical Methods:

Purpose: Information request for cleaning alcohol

Experimental Procedure: SUBSTRATE MATERIAL: Ceramics- Al<sub>2</sub>O<sub>3</sub>  
QUESTION ASKED: Request a listing of possible product that could be used to clean Poly Vinyl Alcohol (Elvanol) from alumina surfaces.

Results: RESPONSE/ANSWER: The Massachusetts Toxics Use Reduction Institute (TURI) has made the results of the tests conducted at the Institute's Surface Cleaning Laboratory (SCL) into a searchable database/ spreadsheet format. This should make alternative cleaner selection faster and easier. Here are the results of your query, based on the information supplied: Table 1 is a listing of cleaners that met specifications according to your input from the Test Request form. The information was based on vendor supplied data. Table 2 is from the lab's Effective Tests Conditions Database. The products listed had been tested on a contaminant which was similar to the one listed on your request.
