

# CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2024

DateRun: 10/07/2024

Experimenters: Amelia Wagner

ClientType: Cleaner Manufacturer

ProjectNumber: Project #2

Substrates: Glass/Quartz, Chrome

PartType: Coupon

Contaminants: SSL Soil 2 Glass Soap Scum

Cleaning Methods: Manual Wipe

Analytical Methods: Gravimetric

Purpose: To test the efficacy of the client's glass cleaning product against comparative glass cleaning market products.

Experimental Procedure: Three coupons for each substrate for each cleaner were weighed for initial weights. About 0.15-0.2 g of Glass soil that was made previously was put onto the coupons and was left to dry overnight (24-hour dry time). The following day, dirty weights were taken and recorded. Three coupons of the same substrate were placed in the SLW Machine; there were w per Wypall (one Wypall per substrate, per cleaner) amounting to about 2.5 ml of each cleaning chemistry per coupon. The SLW Machine was run for 20 cycles (30 seconds of cleaning). The coupons were taken out and left to dry for another 24 hours. After the 24 hours, they were weighed again for final weights.

Results:	Cleaner	Coupon Type	Initial wt of cont.	Final wt of cont.	%Cont Removed	% AVG	% Overall
Seventh Generation Glass Cleaner	Mirror		0.0340	0.0004	98.82	99.24	97.23
			0.0367	0.0004	98.91		
			0.0163	0.0000	100.00

# CLEANING LABORATORY EVALUATION SUMMARY

		0.0311	0.0019	93.89	
	Chrome	0.0385	0.0141	63.38	77.72
		0.0164	0.0039	76.22	
		0.0295	0.0019	93.56	

Summary:

<b>Substrates:</b>	Glass/Quartz, Chrome				
<b>Contaminants:</b>	SSL Soil 2 Glass Soap Scum				
<b>Company Name:</b>	<b>Product Name:</b>	<b>Conc.:</b>	<b>Efficiency:</b>	<b>Effective:</b>	<b>Observations:</b>
Green Mountain Amenities	GMA White Vinegar Glass Cleaner	RTU	85.05	<input checked="" type="checkbox"/>	
Seventh Generation	Glass Cleaner	RTU	97.23	<input checked="" type="checkbox"/>	
SC Johnson & Son Inc	Windex Glass Original w/ Ammonia-D	RTU	78.18	<input checked="" type="checkbox"/>	
Stoner Car Care	Invisible Glass	RTU	96.35	<input checked="" type="checkbox"/>	

Conclusion:

Both the Seventh Generation Glass Cleaner and the Invisible Glass showed high efficacy across all substrates. The Windex was highly successful in removing the glass soil from mirror and glass, but struggled significantly in removing the glass soil from chrome. While the Green Mountain Amenities Glass cleaner showed to be effective in removing the glass soil from mirror and glass, it did not match the performance of the other three cleaners in removing the soil from mirror. It was able to match the performance of the other three cleaners in removing the soil from glass. The Green Mountain Amenities Glass Cleaner also struggled to remove the glass soil from chrome as the Windex did, however it was able to perform better than the Windex in this scenario.
