

# CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 1996

DateRun: 05/02/1996

Experimenters: Jay Jankauskas

ClientType: Chemical Company

ProjectNumber: Project #1

Substrates: Stainless Steel

PartType: Coupon

Contaminants: Carbon Deposits, Cutting/Tapping Fluids, Greases, Lubricating/Lapping Oils, Oil

Cleaning Methods: Immersion/Soak

Analytical Methods:

Purpose: Remove baked on oil and grease

Experimental Procedure: On the following pages are the results from the testing performed yesterday. The following cleaning conditions were used:  
Baked On Oil Mixture  
Cleaned for 5 minutes in a beaker with no agitation. Rinsing was for 30 seconds in a beaker with a 10% solution of Buckeye Shopmaster  
Lithium Grease  
Cleaned for 10 minutes in a beaker with stir-bar agitation. Rinsing was also for 30 seconds with a 10% solution of Buckeye Shopmaster.

## Results:

Cleaning Solution: 15% Solution of Bio-T Max

Twin Rivers Technologies	Graffiti Remover	100	64.22	<input type="checkbox"/>	
Twin Rivers Technologies	Methyl Ester 1618	100	93.03	<input checked="" type="checkbox"/>	

Conclusion:

Quite a bit of the Ester was still on the coupons when I weighed them this morning, so this threw off the results a bit especially on the baked-on oil mixture. All in all, though, the results looked pretty good.
