Purpose: Information request for die cleaning

Experimental Procedure: SUBSTRATE MATERIAL: Machinery
QUESTION ASKED: Looking for a fluid type of cleaning machinery for complex polymer die pieces. Conventional oxidative high temperature methods are not working well.

Results: RESPONSE/ANSWER: In 1998, the Massachusetts Toxics Use Reduction Institute (TURI) will publish the results of the tests conducted at the Institutes Surface Cleaning Laboratory (SCL) in a searchable database/spreadsheet format. This should make alternative cleaner selection faster and easier. Here are the results of your query, based on the information supplied:
