SCL #: 1999

DateRun: 07/16/1999

Experimenters: Nicole Vayo

ClientType: Lab

Substrates: Copper

PartType: Coupon

Contaminants: Coatings, Inks

Cleaning Methods: Immersion/Soak

Analytical Methods: Gravimetric, Visual

Purpose: Laboratory evaluations of alternative cleaning products

Experimental Procedure: Two products were diluted to 5% and heated to 130 F. Copper coupons were coated with a coating and an ink.

Results: The black dye may be pulling off some copper during immersion. These two products don't react with copper. No signs of corrosion were detected visually.
