

# CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2008  
DateRun: 05/21/2008  
Experimenters: Jason Marshall, Shweta Bansal  
ClientType: Machining Company  
ProjectNumber: Project #1  
Substrates: Aluminum  
PartType: Coupon  
Contaminants: Cutting/Tapping Fluids  
Cleaning Methods: Mechanical Agitation  
Analytical Methods: Gravimetric  
Purpose: To evaluate products at higher concentrations and longer times on cutting fluid.

Experimental Procedure: Three products from previous lab testing were used at 20% dilution and one was used at five percent. Prewedged coupons were coated with the supplied cutting fluid (WA wood, 57 F Cutting oil) using a handheld swab and weighed a second time to determine the amount of soil added.  
Each cleaner was put in a bowl and three coupons were dunked into the solution at a constant rate for 30 seconds of cleaning. The coupons were then put on a tray and when done and allowed to air dry. There was no rinse. The process was done to as closely replicate the process used on site as possible. Once dry, final weights were recorded, and efficiency calculated for each coupon cleaned.  
A second batch of coupons were cleaned for 1 minute following all other procedures. An additional three products were included in the evaluation at 20% dilutions.

Results: The 20% solution at 30 seconds were still ineffective on the grinding fluid. However, the increased cleaning time (1 minute) improved the results of one of the products removing 70% of the contaminant. The table lists the amount of soil added, the amount remaining and the efficiency for each coupon cleaned at both time lengths.

Summary:

<b>Substrates:</b>	Aluminum				
<b>Contaminants:</b>	Cutting/Tapping Fluids				
<b>Company Name:</b>	<b>Product Name:</b>	<b>Conc.:</b>	<b>Efficiency:</b>	<b>Effective:</b>	<b>Observations:</b>
Buckeye International	Shopmaster LPH	20	50.68	<input type="checkbox"/>	
Buckeye International	Shopmaster HP	20	58.64	<input type="checkbox"/>	
Bio Chem Systems	Bio T 300 B	5	27.00	<input type="checkbox"/>	
Gemtek Products	SC Aircraft & Metal Cleaner Super Concentrate	20	69.87	<input checked="" type="checkbox"/>	
Oakite Products	Inproclean 3800	20	59.55	<input type="checkbox"/>	
Brulin Corporation	Aquavantage 1400	20	60.72	<input type="checkbox"/>	

Conclusion:

Only one product, SC Aircraft & Metal Cleaner, had partial success, removing about 70% of the cutting fluid.
