

# CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2008  
 DateRun: 11/04/2008  
 Experimenters: Johanna Oviedo  
 ClientType: Lab  
 ProjectNumber: Project #1  
 Substrates: Stainless Steel  
 PartType: Coupon  
 Contaminants: Oil  
 Cleaning Methods: Immersion/Soak  
 Analytical Methods: Gravimetric

Purpose: To test nontoxic industrial cleaning solution for oil removal.

Experimental Procedure: Basic cleaning performance testing was conducted using ASTM G122 as the bases for cleaning. Products were selected based in the compatibility of substrate and removal of foreign substance. Used 10% of concentration and heated the samples at 135 F. The coupons were immersed in a product for 5 minutes, dried in 30 seconds using compressed air is room temperature. The contaminated coupons were weighed again to determine the amount of soil added. After cleaning process, the final weights were recorded, efficiencies were calculated and recorded.
