

# CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2009  
DateRun: 10/19/2009  
Experimenters: Heidi Wilcox, Junhee Cho, Scott Nadolna  
ClientType: Ceramic Coating Company  
ProjectNumber: Project #2  
Substrates: Aluminum  
PartType: Coupon  
Contaminants: Waxes  
Cleaning Methods: Manual Wipe  
Analytical Methods: Gravimetric  
Purpose: To identify possible alternatives to toluene for manual wax removal.

Experimental Procedure: Nine products were selected from the lab's on-line database, [www.cleanersolutions.org](http://www.cleanersolutions.org), based on client supplied information. All were used at room temperature. Five alkaline aqueous cleaners were diluted to 5% using DI water in 300 ml beakers. Four cleaners were used at full strength. Twenty-four preweighed aluminum coupons were coated with wax manually without heat gun and allowed to dry for 24 hours at room temperature. The contaminated coupons were weighed again to determine the amount of soil added.  
Each cleaner tested with three coupons. Three coupons were placed into a Gardner Straight Line Washability unit. A Kimberly Clark Reinforced paper towel was attached to the cleaning sled and soaked with 5-7 sprays of cleaning solutions. Each coupon was sprayed 3 times with the same cleaning solution. Coupon was cleaned for 18 cycles (~30 seconds) straightly. At the end of the cleaning, coupons were dried at room temperature naturally. Final weights were recorded and efficiencies were calculated and recorded.

Results: Three products were effective in removing the wax with a manual wiping action. The table lists the amount of soil initially added and the amount remaining after cleaning and the product efficiency for each coupon cleaned.

Product	Initial wt	Final wt	% Removed
Buckeye Shopmaster RC 100%			
	0.0245	0.0009	96.32
	0.0360	0.0008	97.77
	0.0257	0.0015	94.16
Gemtek SC Aircraft metal cleaner 5%			
	0.0244	0.0029	88.11
	0.0257	0.0036	85.99
	0.0444	0.0089	79.95
Biochem Solsafe 245 100%			
	0.0425	0.0037	91.29
	0.0381	0.006	84.25
	0.0483	0.0106	78.05
AG Environment Soy Clear 1500 100%			
	0.0524	0.0181	65.45
	0.0587	0.018	69.33
	0.0405	0.0198	51.11

Summary:

<b>Substrates:</b>	Aluminum				
<b>Contaminants:</b>	Waxes				
<b>Company Name:</b>	<b>Product Name:</b>	<b>Conc.:</b>	<b>Efficiency:</b>	<b>Effective:</b>	<b>Observations:</b>
Buckeye International	Shopmaster RC	100	95.08	<input checked="" type="checkbox"/>	
Gemtek Products	SC Aircraft & Metal Cleaner Super Concentrate	5	84.68	<input checked="" type="checkbox"/>	
Bio Chem Systems	Solsafe 245	100	84.53	<input checked="" type="checkbox"/>	
AG Environmental Products	Soy Clear 1500	100	61.96	<input type="checkbox"/>	
MacDermid Industrial Products	New Dimensions LF Supreme	5	64.53	<input type="checkbox"/>	
Alconox Inc	Detergent 8	5	76.21	<input type="checkbox"/>	
PCI of America	Hurrisafe 9100 Paint Prep	5	67.80	<input type="checkbox"/>	
Activeion Cleaning Solutions LLC	Activeion Pro	100	67.47	<input type="checkbox"/>	

Conclusion:

Three products (Shopmaster RC, SC Aircraft metal cleaner, Solsafe 245) removed more than 85% of the wax from aluminum coupon. A follow up test will be conducted using longer cleaning times.
