DateRun: 03/10/2003

Experimenters: Jason Marshall

ClientType: Metal

ProjectNumber: Project #1

Substrates: Glass/Quartz, Other

PartType: Coupon

Contaminants: Dirt

Cleaning Methods: Ultrasonics

Analytical Methods:

Purpose: To generate a list of products that have been evaluated successfully in the lab under similar conditions

Experimental Procedure: Using the supplied information from the Database Search form, two lists of products were created. The first list contains products that have been used in the lab for glass cleaning. The contaminants and equipment may not match the supplied information. The second list contains products recommended by vendors. The products match the specified information from the search form.

Results: Table lists laboratory tested products based on glass substrates.
