

CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2003

DateRun: 05/16/2003

Experimenters: Jason Marshall

ClientType: Chemical Company

ProjectNumber: Project #1

Substrates: Stainless Steel, Steel

PartType: Coupon

Contaminants: Adhesive, Paints, Resins/Rosins, Chemical

Cleaning Methods:

Analytical Methods:

Purpose: Information request

Experimental Procedure: Using the laboratory's database, two lists of products were generated. The first list consists of products that have been evaluated at SSL under conditions similar to current cleaning process. The second list contains products that meet the requirements according to vendor supplied information, but may not have been verified experimentally by the lab.

Results: RESPONSE: The Massachusetts Toxics Use Reduction Institute (TURI) has made the results of the tests conducted at the Institute's Surface Solutions Laboratory into a searchable database format. This should make alternative cleaner selection faster and easier. Here are the results of your query, based on the information supplied. The first table includes the products evaluated at SSL. The specific contaminants tested at SSL on steel or stainless steel substrates are listed afterwards. Process equipment included manual wiping, immersion soaking, and ultrasonics.

Table of Products Evaluated on Steel and Stainless Steel

1	Resin - Ashland Specialty Chemical Co, Acrylic Resin, Aroset 1872 Z 40 (108-88-3, 141-78-6, 142-82-5, 67-63-0)
2	Resin - Formaldehyde Based Resin
3	Resin - Solutia Inc. Gelva Multipolymer Resin Solution 2895 (50862-46-9, 141-78-6, 142-82-5, 67-63-0, 64-17-5, 108-05-4)

The vendor recommended products that were identified for adhesive, paint and resin removal from steel and stainless steel using ultrasonic energy. The Value listed in the table is an environmental ranking based on SSL's indicators: VOC content, Global Warming Potentials, Ozone Depletion Potentials, HMIS/ NFPR ratings and pH. Scores are based on a maximum of 50 points. The higher the scores implies a potentially safer product.

Summary:

Conclusion:

Cleaning varies from case to case. The SSL recommends process specific testing on potential replacement cleaning chemicals. If more information is needed on a particular product, or you are interested in conducting cleaning trials, please contact the lab at (978)934-3133.
