

## CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2016  
DateRun: 02/29/2016  
Experimenters: Abigail Giarrosso, Catherine York, Sabrina Apel  
ClientType: General  
ProjectNumber: Project #1  
Substrates: Aluminum, Brass, Stainless Steel  
PartType: Coupon  
Contaminants: Lubricating/Lapping Oils  
Cleaning Methods: Immersion/Soak  
Analytical Methods: Gravimetric

Purpose: To eliminate the use of N-Propyl Bromide in cleaning operations

Experimental Procedure: Four cleaners were tested at room temperature on aluminum, brass, and stainless-steel coupons to evaluate how the soil Navi Guard Way Lube 32 was cleaned. Prewedged coupons were coated with the supplied Navi Guard soil using a handheld swab and weighed a second time to determine the amount of soil added. Each cleaner was put in a beaker and three coupons were immersed into the solution for 5 minutes. The coupons were then stood upright to air dry for 15 minutes and then placed on a tray. There was no rinse. Once dry, final weights were measured and efficiency calculated for each coupon cleaned.

Results:

| Cleaner         | Substrate | Initial Wt | Final Wt | % Removed |
|-----------------|-----------|------------|----------|-----------|
| Fluosolv CX     | Aluminum  | 21.5357    | 21.5362  | 98.73     |
|                 | Aluminum  | 21.5777    | 21.5790  | 96.95     |
|                 | Aluminum  | 21.5357    | 21.5362  | 98.73     |
|                 | Brass     | 69.4516    | 69.4517  | 99.51     |
|                 | Brass     | 69.5391    | 69.5396  | 98.05     |
|                 | Brass     | 69.6129    | 69.6129  | 100.00    |
|                 | Stainless | 60.1003    | 60.1009  | 97.35     |
|                 | Stainless | 63.9329    | 63.9331  | 99.45     |
|                 | Stainless | 63.8901    | 63.8941  | 90.85     |
| Fluosolv NC     | Aluminum  | 21.0619    | 21.0619  | 100.00    |
|                 | Aluminum  | 21.1997    | 21.1997  | 100.00    |
|                 | Aluminum  | 21.1747    | 21.1749  | 99.58     |
|                 | Brass     | 69.4374    | 69.4375  | 99.83     |
|                 | Brass     | 69.3301    | 69.3302  | 99.69     |
|                 | Brass     | 49.5338    | 49.5341  | 99.38     |
|                 | Stainless | 59.5762    | 59.5787  | 97.61     |
|                 | Stainless | 59.1224    | 59.1268  | 93.69     |
|                 | Stainless | 60.0314    | 60.0339  | 94.49     |

Conclusion:

All four cleaners efficiently removed the Navi Guard soil on all three substrates at room temperature. The least efficient cleaner used was Solstice 2A from Honeywell, with the lowest cleaning average on the stainless-steel substrate. The Solstice 2A was still an efficient cleaner with a 97.52% efficiency but was less efficient than the other cleaners used. The most efficient cleaner would be Solstice PF from Honeywell which had an efficiency of 98.48%. All cleaners worked extremely well.
