CLEANING LABORATORY EVALUATION SUMMARY

SCL #: 2016

DateRun: 12/06/2016

Experimenters: John Truong, James Keats

ClientType:

ProjectNumber: Project #1

Substrates: White Board

PartType: Coupon

Contaminants: Lubricating/Lapping Oils, Dirt

Cleaning Methods: Manual Wipe

Analytical Methods: Gravimetric

Purpose: Evaluate compartaive products on same soils as Troy Corp cleaners

Experimental Procedure: Initial weights of the coupons were recorded. The coupons were then soiled with 1.6g of bike soil. Dirty weights were recorded and they were placed in threes into the Manual SLW machine. The coupons and paper towel were both sprayed twice with the selected cleaner. 5 complete back and forth cycles were run and the coupons were then allowed to dry. Once dry, the clean weights were recorded. This process was repeated for each cleaner.
